v Chapter 15 covers additional ratemaking methods commonly used by commercial insurers. The methods are divided into two categories: those that alter the rate calculated from the rating manual and those that are employed by insurers to calculate a premium unique to a particular large commercial risk.

The seven basic tools of quality is a designation given to a fixed set of graphical techniques identified as being most helpful in troubleshooting issues related to quality. They are called basic because they are suitable for people with little formal training in statistics and because they can be used to solve the vast majority of quality-related issues.

Seven basic tools of quality - Wikipedia

Infix notation is a method where unary operations are input into the calculator in the same order as they are written on paper. Different forms of this input scheme exist. In the algebraic entry system with hierarchy (AESH), the precedence of basic mathematical operators is taken into account, whereas calculators with algebraic entry system with parentheses (AESP) support the entry of parentheses.
