Chemical biology is a scientific discipline spanning the fields of chemistry and biology. The discipline involves the application of chemical techniques, analysis, and often small molecules produced through synthetic chemistry, to the study and manipulation of biological systems. In contrast to biochemistry, which involves the study of the chemistry of biomolecules and regulation of biochemical ...

Chemical biology - Wikipedia

Current Biology is widely valued among life scientists for its unique blend of important research papers and informed, lively commentary. Published every 2 weeks, the journal delivers exciting primary research from all areas of biology, from molecular biology to evolution.

Current Biology | ScienceDirect.com

Mathematical and theoretical biology is a branch of biology which employs theoretical analysis, mathematical models and abstractions of the living organisms to investigate the principles that govern the structure, development and behavior of the systems, as opposed to experimental biology which deals with the conduction of experiments to prove and validate the scientific theories.

As the highest-ranked open access journal in its field, Genome Biology publishes outstanding research that advances the fields of biology and biomedicine from a genomic and post-genomic perspective. Our responsive international editors provide excellent service and communication to authors throughout the entire publishing experience.

Management Tips. All biology teachers should start the year by having students and parents/guardians sign a "Student Safety Contract". I have included an optional "Web Page Permission" form in the Word version in case you have a class web page in which you would like to include pictures. It can easily be deleted.

Visual neurons in the primate frontal eye field help guide eye movements. Now, Scerra et al. demonstrate that their contribution is limited: these cells distinguish targets from distracters prior to some, but not all, visually informed saccadic choices; they can select goals on the basis of saliency, but not on the basis of arbitrary visual features.
