The ProgOper output indicates the control of the PIDE instruction. If the output is a 1 then it is in Program control and if the output is a 0 then it is in Operator control. The Program request inputs take precedence over the Operator requests so that the program can lock out any operator overrides. The ProgValueReset input clears all input requests.

Question this week: is there a quilter whose work always inspires you? Mostly I look to antique quilts for inspiration, settings, fabrics colors used together, scale of prints, then I go to my fabric shelves and begin pulling fabrics, the pull will get resorted and new additions added along the journey. You see, I'm old!
