A full-body scanner is a device that detects objects on a person's body for security screening purposes, without physically removing clothes or making physical contact. Depending on the technology used, the operator may see an alternate-wavelength image of the person's naked body, or merely a cartoon-like representation of the person with an indicator showing where any suspicious items were ...

Body image is a person's perception of the aesthetics or sexual attractiveness of their own body. It involves how a person sees themselves according to the standards that have been set by society. The Austrian neurologist and psychoanalyst Paul Schilder coined the phrase body-image in his book *The Image and Appearance of the Human Body* (1935). Human society has at all times placed great value ...
